

Dr. John J. Novak & Dr. Brooke A. Bader

36840 Detroit Rd • Avon, OH 44011 • Tel 440-934-1144

Welcome to the office of Dr. John Novak & Dr. Brooke Bader.

Retinal Photographs

- We are now able to offer you digital retinal photos as part of your comprehensive eye exam and an educational tool to discuss your health and wellness.
- This procedure only takes an additional 2 minutes, often without dilation or drops, and assists the doctor in early detection of many disorders including glaucoma, diabetes, macular degeneration, retinal detachment, and other vision threatening conditions.
- The images serve as a baseline for all ages and are stored to compare even the smallest amount of change at future exams. These are performed annually.
- These can be emailed if you would like your own copy or shared with a specialist as needed.

Retinal photos are especially important for people who have/are:

- New patients to our office or who have not had retinal photos before as a baseline
- Diabetes, high cholesterol, and/or cardiovascular conditions (high blood pressure, etc.)
- A family history of diabetes, high blood pressure, or high cholesterol
- A family history of glaucoma or macular degeneration
- Seeing floaters or flashes
